## Summary

I'm a Highly skilled individual with a passion and dedication of learning new skills and adapting to change. I firmly believe in learning new things so that I can be better at what I do.

I'm a Software developer with experience in developing web and mobile applications using Javascript, HTML/CSS, php, react.js, react native, Ionic with react.js languages and frameworks. I am dedicated to hard work and bring a high work ethic when given the opportunity to apply knowledge and skills.

I am open to learning new technologies and programming languages.

I am also interested in staying up to date with industry trends and the set of evolving technology in the 4th Industrial Revolution (4IR) era.

I am open to study an evolving body of technology or any segment of the System Development Life Cycle.

## Experience

Customer Service Representative | November 2023 - January 2024

- Demonstrated exceptional customer service while operating the till.
- Managed printer and service center operations with precision.
- Proficient in laminating, copying, printouts, and document binding.
- Contributed positively to overall customer experience during a 3-month tenure.

## Projects:

2nd year 1st semester Full Stack functional Web  
application development (Uni Help Website) Feb 2022 -  
Jun 2022Feb 2022 - Jun 2022

Associated with University of Johannesburg

Web application that helps secondary school students to  
get university sites and applications. The name of the  
Web Site is "Uni Help". The site provides a platform for  
students who want to apply for university, so we help  
students with registration and tracking their applications  
making it easy for students to apply and further their  
studies.

Marketing Hub 2nd year 2nd semester full stack app  
development Marketing Hub

Associated with University of Johannesburg

This application is a social media platform where buyers  
and sellers meet. Makes it easy for individuals that want  
to buy and those that want to sell to communicate,  
advertise and review what they are interested in.
